Sub : Implementation of mandatory Internship Policy for Students

Internships are educational and career development opportunities, providing practical experience in a field or discipline. They are structured, short-term, supervised placements often focused around particular tasks or projects with defined timescales. An internship may be compensated, non-compensated or some time may be paid. The internship has to be meaningful and mutually beneficial to the intern and the organization.

Following are the intended objectives:

- To expose the students to industrial environment (viz. various materials, processes, products and their applications along with relevant aspects of quality control which cannot be simulated in the classroom) for application of existing engineering knowledge in industrial situations
- To provide possible opportunities to learn and sharpen the real time technical and managerial skills required for professional career
- Understand the social, environmental, economic and administrative considerations that influence the working environment
- To expose students to the engineer's responsibilities and ethics
- To get acquainted with the working styles of industries at different hierarchy and learn to work in a team
- To gain experience in all types of professional communications (viz. preinternship applications, during internships people skills and documentation skills and post internship reports/projects writing skills)
- To demonstrate the impact of the internship on their lifelong learning and professional development
- To provide the linkages of future job/research opportunities to students in the organization
